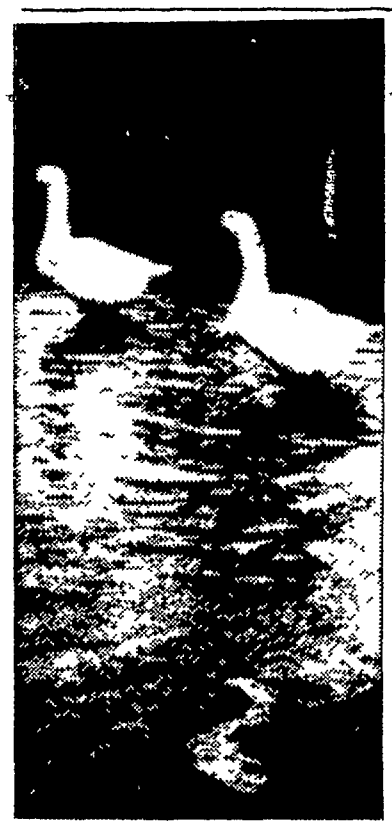
Lancaster Farming

VOL. 14 NO. 1 | Lancaster Farming, Saturday, November 30, 1968 | $2 00 Per Year



IF YOU DIDN'T HAVE TURKEY for Thanksgiving, maybe you had a goose (like those nice fellows above that Lancaster Farming's Editor photographed Tuesday morning) or a duck or even a guinea. At least you could have if you were invited to dine with the Marvin L. Brubacker family, 899 East Main Street in Ephrata. This farm family of eight, raise 200 geese, 2,000 ducks and 700 guinea fowl on their 63 acre farm located on Route 322, 2 miles East of the Ephrata square. The Brubacker's also fatten 30 steers and 40 hogs per year, care for 4900 laying hens.

A. Breneman Named Guernsey Assn. President

Arthur Breneman, Willow Street R1, was elected president of the Lancaster County Guernsey Breeders Association Monday night at a reorganization meeting held at the Harry S Mumma Farm, Landisville. Breneman succeeds Mumma as head of the local unit.

Other officers named included Ellis Denlinger, Gordonville,

Weekly Poultry Report

Eastern Pennsylvania And New Jersey

Prices of light type hens ranged unchanged, however trended lower within the range Offerings adequate to barely adequate for needs as most processing plants expected to be closed balance of week. Heavy hens adequate to short of full call. Sales too few to quote prices Light Type 7-9½ M 8-9c Heavy Type TFEWR

Eastern Shore Exchange

Broiler and fryer live prices averaged 14.94 cents a pound this week. Prices paid ranged from a high of 15 6 cents a pound on Wednesday to a low of 14.2 cents a pound on Monday. Total sales for the three-day Thanksgiving week were 371,500 head down 125,500 head from last week.

Birthday Issue

With this issue, Lancaster Farming starts it's fourteenth year as Lancaster County's Own Farm Weekly. You will not see a great change in this our birthday issue or in subsequent issues as they appear each week through the year. We will still cover all the farm news as it occurs and speak editorially for and to the farmer in whatever way we believe is for his best interest. The only difference you can notice is the Vol. No. has advanced to 14.

Fogelsville

November 25, 1968

(Prices paid dock weights, cents per lb., except where noted)

Light Hens 7½-9½, mostly 7½-8; Heavy Hens 9 17, mostly 10-14; Pullets 18 30, mostly 25-28, Roasters 9-30, mostly 20 28; Capons 22-45; Ducks 20-28, Drakes 25 38, mostly 35-38, Geese 16-32½, mostly 30-32½; Tom Turkeys 13-37, mostly 20-24; Hen Turkeys 19 33, mostly 28 31, Rabbits 25 44, mostly 40-42; Guineas 45-65, Pigeons (per pair) 65-1 30.

Total coops sold 577.

Due to Thanksgiving Holiday, Auction was held on Monday instead of Tuesday.

Light Cattle Continue to Help Prices

Fed-cattle marketings have been well above a year ago, but prices have been higher, too. Cattle feeders all through the first 9 months of 1968 have done a good job of marketing cattle as they reached weight At seven leading markets, average weight during September was 15 pounds less than a year earlier. This was a substantial price-strengthening factor.

Excessive weights this fall and winter are still a possibility, but less likely now that cattle feeding has become a business of professionals Many of the feeders who used to take pride in "topping" the market can no longer afford this expensive hobby.

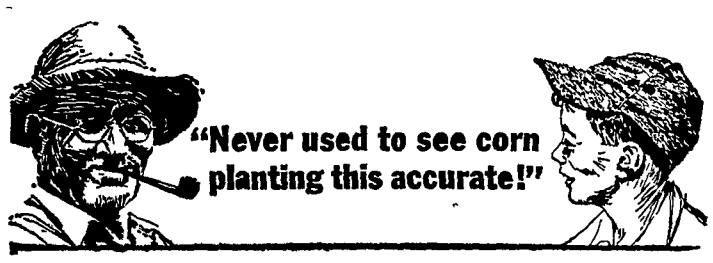
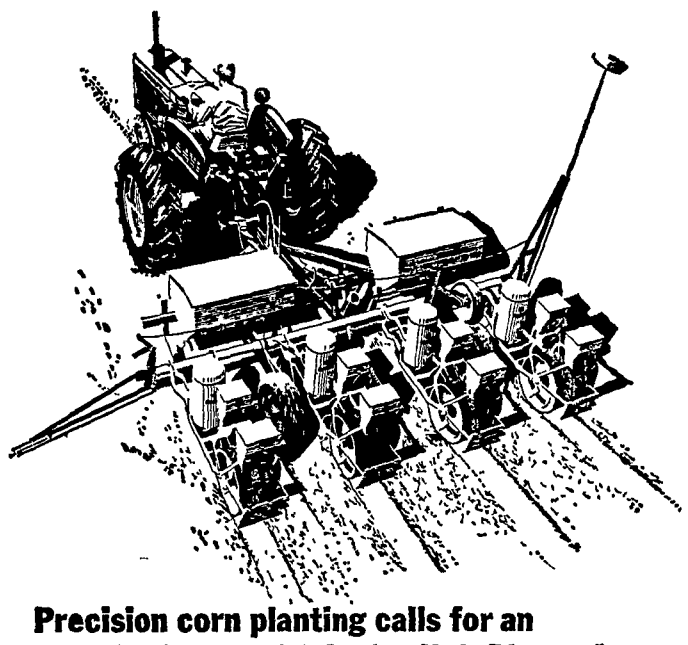
Good and Bad Hog News

The latest pig crop report indicates that hog marketings in the October - December period may be a little smaller than last year Even though hog prices will decline seasonally from current levels, they will probably remain above 1967 prices With hog prices favorable and grain at low prices, the hog enterprise will be profitable through the remainder of 1968

The possible bad news relates to producers' intentions to expand the hog business During the summer, hog producers expanded farrowings at a more rapid pace than they predicted last June At that time they indicated they would farrow only 2 percent more pigs (than in 1967) in the June-August period —but they actually produced 5 percent more They will produce 4 percent more from September-November, compared to their earlier intention of 2 percent. If this crop materializes, hog marketings during the winter and spring will be larger than a year earlier Prices may not recover from the fall low, and the January-March price could be $ 50 to $1 00 below the same period this year.

START PLANNING NOW!





Precision corn planting calls for an Allis-Chalmers 500 Series Unit Planter!

The 500 Planter means *uniformity!* In seed spacing, seed depth, soil firmness, fertilizer application. Whether you drill or hill-drop, see how the 500 licks the seed-bounce problem! You pick seed opening equipment to fit your crop and soil. Get your corn in *right* with an A-C 500 Unit Planter!

From Where We Stand . . .

The Devil Is At Work

Archie Moore, the retired boxing champion, recently wrote some interesting comments in the San Diego Union aimed specifically at the American Negro. His words may not earn him a Pulitzer Prize, but they certainly pinpoint the situation.

Writes Mr. Moore:

"The devil is at work in America. Snipers and looters, white and black, deserve no mercy.

'I was born in a ghetto, but I refused to stay there I am a Negro, and proud to be one. I am also an American, and I'm proud of that.

"Today's young people think they have a hard lot They should have been around in the '30's when I was coming up in St. Louis. We had no way to go, but a lot of us made it.

"I became the light heavyweight champion of the world. A kid down the block. Clark Terry, became one of the most famous jazz musicians in the world. There were doctors, lawyers and chiefs who came out of that ghetto.

"We made it because we had a goal and we were willing to work for it. Don't talk to me of your guaranteed national income. Any fool knows that this is insanity.

"Do we bring those who worked to get ahead down to the level of those who never give a - - -? The world owes nobody — black or white — a living. God helps the man who helps himself.

"The depression (1930-41) was horrible, but those who experienced it came out with lasting compensations. They learned first, that even a penny was precious. . . Second, those who experienced the depression learned the value of a job — any kind of a job. You grabbed whatever came along. . . We made it because we had a goal, and we were willing to work for it.

"America has gone to - - -, but this is true:

"In times of adversity, there are more who are willing to sacrifice and fight — because they have to. In times of plenty there are more who want to take it easy.

"The tragedy of our slums is not only their filth and ratholes; it is the unwillingness of so many to sacrifice and work to get out of the ghetto."

Yes, it is a way of life in this country today to take the easy way and let someone else do the work. With the heady heights of prosperity the country has reached, even the union officials and the politicians admit that there is a real chore when trying to figure more promises for people . . . be they in the blue collar brackets, white collar brackets, or even the 'upper echelon' brackets.

Perhaps politicians and other "leaders of people" should study and take a long look at Archie Moore's statement . . . then place themselves categorically into a position of whether they are in existence to really help their fellowman, or for their own betterment, in name, wealth and position

—Iron County Miner, Hurley, Wis.

Overreaction

The general aura of tolerance for the lawbreaker and of permissiveness toward intolerable public behavior has been an important factor precipitating what is now called a "crisis of law and order." The irony of it is that as government moves to satisfy public demand for rejuvenating the rule of law, the first steps, will in many cases, be toward restrictive legislation which will be felt most strongly by the law-abiding citizen and most likely miss controlling the criminal element since they have no intention of obeying the laws anyway.

A case in point can be found in the matter of gun controls. Many new restrictions have been placed on the sale and ownership of firearms and ammunition in this session of Congress. New proposals including the registration and licensing of all firearms will probably be back again in the next session. It is estimated that there may be as many as 100 million guns owned by private citizens in the United States. It would take separate state agencies or another bureau of the federal government to handle the monumental task of registering all these firearms and licensing their owners. Two things would happen, either the whole operation would be allowed to run a major deficit and be supported by other tax revenue, or the cost of licensing to the gun owner would become prohibitive for many sportsmen and gun collectors owning a number of firearms. In any case, the means would be established to restrict or severely limit at any time the ownership of firearms by the private citizens..

In the meanwhile, the criminal element would be left largely untouched since they would not register firearms they intended to use in the commission of a crime. Reestablishment of a national atmosphere of respect for the law and the society which it protects will not come from restriction of the many millions of law-abiding citizens who own guns and use them for the constructive and healthful sports of hunting and competitive shooting.

Across The Fence Row

Consider the postage stamp my son: Its usefulness consists in its ability to stick to one thing until it gets there.

— Josh Billings

A small boy came hurriedly down the street, and halted breathlessly in front of a stranger who was walking in the same direction.

"Have you lost half a dollar?" he asked.

"Yes, yes, I believe I have!" said the stranger, feeling in his pockets.

"Have you found one?"

Oh, no," said the boy. "I just want to find out how many have been lost today. Yours makes fifty-five."

Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

The five-day forecast for the period Saturday through next Wednesday calls for temperatures to average near normal with daytime highs in the mid 40's and overnight lows in the low 30's. Cool at the beginning of the period with temperatures gradually moderating next week. Normal high-low for the period is 46-29.

Precipitation may total less than one-fourth inch with a few snow flurries in the Mountains the beginning of next week and more general rain at mid week.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

IN THE FLESH

Lesson for December 1, 1968

Background Scriptures: 1 John 1 1-4; 4, 2 John. Devotional Reading: Hebrews 2 14-18.

Some people today, as we have noted before, are disposed to dispense with the divinity of Christ. To them, Jesus was simply a "good man," "a great teacher," "our perfect example," "the most Godly man who ever lived," — but still a man!

Rev. Althouse

There is another heretical temptation, however, that leads people to the opposite extreme. It is the temptation to disregard the humanity of Christ, to forget that Jesus was truly a man. This was evident a few years ago in the reaction of some people to the motion picture, The Gospel According to St. Matthew. Some objected bitterly to the film's depiction of Jesus as very much a man. Quite accustomed to the Hollywood bathrobe dramas in which the figure of Jesus is little more than a phantom, it was hard for some to think of him in such human terms.

"Very man"

This is not a new problem in the life of the Church. It is a controversy that has often plagued Christianity. In the fifth century A.D. there were Christians who emphasized only the divinity of Christ. They said that Jesus only "seemed" to be human. As a divine being in human disguise, he did not really get hungry as men do, he only "seemed" to get hungry. He also only "seemed" to get thirsty, tired, and tempted. He was, they said, a God who only looked human in appearance.

In time, the Church branded this concept as heresy. The Council of Chalcedon in 451 A.D insisted that Jesus was "very man," ("very" meaning really). It declared that his manood was complete. He didn't seem to be a man, he was a man. He is, they said, "of one substance with us as regards his manhood; like us in all respects, apart from sin."

The writers of the four Gospels also took pains to indicate that Jesus did not just seem to suffer on the cross, but that he really suffered and really died too. Thus in the so-called Apostles' Creed we are very careful to spell it out: ". . . suffered under Pontius Pilate, crucified, dead, and buried . . ."

By this you know

This same concern to preserve the truth of Christ's humanity is found in both 1 and 2 John. "By this you know the Spirit of God: every spirit which confesses that Jesus Christ has come in the flesh is of God . . ." (I John 4:2 RSV) And again in 2 John 7: "For many deceivers have gone out into the world, men who will not acknowledge the coming of Jesus Christ in the flesh; such a one is a deceiver. . ."

Why is this so important to the writer of 1 and 2 John? Why has the Church always been so concerned to preserve the doctrine of his humanity? Why is it so important for the writer of the Gospel of John to say: "And the Word became flesh and dwelt among us . . ." (John 1:14)? What does it matter for God to have come "in the flesh"?

Only a man

If Jesus had not been fully human, he would have little attraction for us. We could dismiss the price he paid on Calvary with the knowledge that he didn't really suffer. We could ignore his example and teachings, dismissing them as lying beyond human capabilities. We would not likely go to him with our problems, our concerns, our heartaches, nor accept his comfort and counsel: for what could a divine being know of the sufferings of men?

Because Jesus was fully human as we are, because he knew all that we know and experienced all that we experience, we cannot ignore the call he gives us. When he says "This is what you can become," we can take him seriously, for he has first-hand knowledge of us. Only a man, fully human, could inspire us to realize the full potentialities of our humanity. Because he became what we are, we are called to become what he is. That's why it is important that the Word became flesh.

For Full Market Reports Read LANCASTER FARMING

NOW IS THE TIME . . .

By Max Smith
Lancaster County Agent

To Inspect Self-Feeders

This would be a good time to check the self-feeders in your hog or steer pens. Some feeders may waste as much as 20% of the grain; a well adjusted feeder should have very little grain in the trough at any time; the animals should have to work a little to get the feed down and then they will consume it with a minimum of waste Efficient production requires a minimum of wasted feed

To Use Brooders

Colder weather is arriving and new-born pigs and lambs will make good use of extra heat in the barn. There are many types of heat lamps and supplemental heat that will reduce the dampness and increase the room temperature. The first few hours are very important and chilling should be prevented.

To Sell When Ready

Efficiency in gain of weight on hogs and cattle is a very important part in a profitable fattening program More and more feeders are learning to "top out" animals when they have reached market weight and when they will get a good return on feed consumed. The practice of holding animals for weeks in order to get a higher price is very risky and usually not profitable. Many feeders who used to take great pride in topping the market can no longer afford this expensive hobby.

● Keystone

(Continued from Page 1)

Jesse L. Balmer, Dean Bollinger, all from Warwick.

Dr. Harry Gerlach, County Superintendent of Schools is the Honorary Keystone Farmer Degree winner. Gerlach was cited for his support of the local FFA Chapters and his interest in the County Ag program. "His assistance and leadership is much appreciated," Givler said.

The local Citation Award goes to the Lancaster Livestock Exchange for their effort in arrangement of the annual County FFA Swine Show at the Lancaster Stockyards and the handling of the following sale of the swine projects.

Also to be honored in the awards program is Mr and Mrs. Howard Weber, Mohnton R2, the parents of State Secretary Kenneth E Weber Mr. Weber will receive the Honorary Keystone Farmer Degrees and Mrs. Weber will be presented with a Citation Certificate.

Earl Stauffer, Cloister Chapter was also reported a runner-up to the Regional II Star Farmer, George Ungemach, Little Dutchman Chapter in Lebanon County.

The awards are scheduled to be conferred on these candidates January 15 at the Forum of the Educational Building in Harrisburg.

It is necessary to be almost a genius to make a good husband. —Balzac.

● Mystery Farm Contest

(Continued from Page 1)

ent area each week is published. The general direction from Lancaster is given and from there it's up to you.

Study the picture each week. Guess which of your neighbor's farm is pictured. Put your identification (the name on the mail box and his address) along with your own name and address on a 5 cent post card or in a letter and mail it each week so we receive it by Friday morning following the Saturday date of publication.

If you give us the correct farmer living on our Mystery Farm, your entry will be placed in competition with all other correct answers at a drawing to be held at the end of the contest.

You or one of your neighbors will be receiving that $100 check just after the beginning of the new year. So enter each week.

A complete list of the contest rules and our address where you send your entries is listed with the Mystery Farm each week. Be sure to follow them We identify each Mystery Farm in the following issue.

That's all there is to it. This week we have a North Central Lancaster County Farm. Hope you know it.

Mystery Farm Contest Rules

1 The contest consists of eight weekly installments featuring the picture of a Lancaster County Farm, each from a different area of the County Cash prizes will be awarded from a drawing of the correct entries following the contest. The awards will be: First Prize, $100; Second Prize, $50 and Third Prize, $25.

2. All paid subscribers to Lancaster Farming are eligible Subscribers may enter each week (8 times) but only one entry per week will be allowed.

3. To enter, study the enlarged photograph within the Mystery Farm Picture Frame in each issue. Guess which of your neighbor's farm is pictured. Put your identification (THE NAME ON THE MAIL BOX AND HIS ADDRESS) along with your own name and address on a five-cent post card or in a letter. (Note: the correct identification will be the person actually living on the farm.) Mail it to us so we have it in our office by Friday morning following the Saturday publishing date.

4 Entries must be mailed to our office address as follows: The Mystery Farm Contest, Lancaster Farming Newspaper, P.O. Box 266, Lititz, Pa. 17543. No phone calls will be accepted as entries.

5 Entries become the property of Lancaster Farming and the decision of the judges is final. Identification of the Mystery Farm will be published in each following issue.

THIS FARM SETTING was featured last week as the second in a series of eight Mystery Farms. It is the farm home of Mr. and Mrs. Harry F. Houser, 436 Beaver Valley Pike. The farm is also known as Big Spring Farm which includes 50 acres located just East of the junction of 272 and 222. Mr. Houser is well-known in poultry circles and the big spring in their front yard is an attraction to the many tourists who find rest at the farm home.

The third Mystery Farm is pictured on Page 1 of this issue as the contest continues. Rules to enter are found with the photograph.

Community Observes F-C Week

(Continued from Page 1)

riculture - Industry Banquet, sponsored by the Agriculture Committee of the Lancaster Chamber of Commerce was held Tuesday night Here some 300 farmers and businessmen with their wives met across dinner tables to discuss mutual interests and to become better acquainted.

Earlier in the week, the Fulton Grange hosted a group of city businessmen on a farm tour of Southern Lancaster County and Maryland and provided a full course meal at the grange hall in the evening

And at Ephrata, the Cloister FFA Chapter took 130 sixth grade city students from Ephrata and Akron to a farm in connection with their special activities

The Ag Banquet

The featured speaker of the Ag-Industry Banquet held in the new auditorium of the Farm and Home Center was Calvin D Johnson Special Consultant for Public Affairs for New Holland Division of Sperry Rand Corp Speaking on the subject 'Opportunities Unlimited" Johnson said, "America is the land of opportunity The only thing that people should ask of government is protection, because it cannot help a man unless he helps himself"

Emphasizing that people should give a day's work for a day's pay, Johnson said he sponsored the "Johnson Work or Don't Eat" law while in the Illinois legislature which forced every able-bodied man on relief to work and earn the amount of his budget. "We ought to go back to the law of no work, no eat," he said.

Quoting the adage, "God helps those who help themselves" Johnson said "the greatest enemy of our nation is laziness. We have an over-production of weakness and a shortage of guts"

Fred C Edwards, Armstrong Cork Company and President of the Chamber gave the welcome from the business community and Amos H. Funk, Master Farmer from Millersville R1. gave the greetings from the farm community

The closing remarks were by M. M Smith County Agent and Chairman of Farm-City Week 'We have long recognized the

importance of good balance of Agriculture and Industry in our County, he said. "And we from Agriculture want you to know that though we have fewer farms, they are larger and better farms producing food more efficiently."

Smith also spoke on behalf of the Farm and Home Foundation saying the Center is a monument to community teamwork. He mentioned that another opportunity to help deplete the mortgage on the center will take place in early 1969. "I hope you will help from your heart and from your hip pocket," he said. "The center was built to maintain good will between Farm and City."

William J. Poorbaugh, Chairman, Agriculture Committee was master of ceremonies and entertainment was provided by the "Sweet Adelines".

Grange Tour

The Grange Tour made it's first stop just south of the Pennsylvania State line at the farm of Richard Holloway and family, at Darlington, Md. Here, the five car-load of grangers and city businessmen were given a first-hand view of the large beef and swine farm located in the rolling Harford County country-side.

Holloway Farm has a herd of beef cows, mostly Angus, and they raise and fatten the calves on the farm A sampling of artificial Charolais breeding has been tried with pleasing results in the dressed carcass

They also buy feeder cattle at the Lancaster Yards and sell fat cattle to a local packer.

Some 40 brood sows are kept and about 700 feeder pigs are sold each year.

The second stop was at the poultry and dairy farm of Ambrose Hanks, Drumore R1, where 10,000 laying hens and a Registered herd of fine Jersey cows provided the income for this 63 acre enterprise.

The dairy herd was purchased about a year ago in Vermont and is doing well under the herdsmanship of Paul Trimble Several of the cows are classified 89 points and the top record on an 8-year-old is 14,900 pounds of milk and 860 pounds of butterfat.

The third farm was that of Grant Kieffer located at Goshen. Keiffer has a herd of 360 Registered Cows with a free-stall barn and a fine calf-raising program

At the conclusion of the tour, some of the city folks visited the James and Jesse Wood farm, some the Clifford Holloway farm and some remained at the Grange Hall until the dinner tour About 75 people enjoyed the food and fellowship in the evening.

Those going on the tour included· Walter Seigfred, PP&L; Mr and Mrs Willis Hess, Hager Bros; George Glover, Bell Telephone, Mr and Mrs Christ Kunzler, Kunzler's Meats; Mr. and Mrs Harry Stacks and Jack Pollard, Lancaster Intell, Victor Plastow, Associate County Agent; Mr and Mrs Ben Herr; Mr and Mrs William Frutchey; Clifford Holloway; Mr and Mrs. Stanley Stauffer Jr, Mr. and Mrs Jesse Wood; Mrs Charles McSparran; Scottie Stauffer and Everett Newswanger, Lancaster Farming.

Ephrata FFA

The FFA Chapter took their charges to the farm of Aaron Z. Stauffer, Ephrata R1 Aaron's two sons— Ronald and Clark — helped organized the tour along with Dennis Martin, chairman of the Farm-City Week Committee

Included in the farm visit were demonstrations on fitting sheep, beef raising, chick management, swine feeding, tobacco stripping and soil and water conservation. The highlight of the observance was a wagon ride in which the students could see the various soil conservation practices that are needed in today's agriculture.

The Farm-City Week Tour is an annual affair for members of the Cloister FFA Chapter as part of their program of work. Lew Ayers is the Vo-Ag teacher in charge.

GOING FOR A RIDE TO SEE CONSERVATION. The sixth grade students from Ephrata and Akron were taken on a farm wagon ride to see the conservation practices on the Aaron Z. Stauffer Farm. The farm tour was part of the project of work for Ephrata FFA Students and was held as a special event of Farm-City Week.

Deer Populations Surveyed

As a service to sportsmen, especially those who hunt deer in the vicinity of Pennsylvania's nearly two million acres of State Forest lands, the Department of Forests and Waters this year conducted a survey to determine the deer population on lands under its jurisdiction.

The district foresters throughout the state were contacted to ascertain areas of State Forest land where deer concentrations were heaviest. This effort to advise hunters of areas of heavy deer concentration has two basic purposes

By directing hunters to areas where the deer concentration is excessive, reduction of the herd will stabilize it at a size the available food supply will support over the winter.

This action will also aid in preventing heavy mortality among the deer herd, during the coming winter, from starvation.

The department is also interested in maintaining the deer herd on State Forest lands at a level that will minimize the danger of over browsing and to prevent excessive damage to adjoining farmlands.

As reported by the district foresters, the following areas of heavy deer concentration should offer better than average opportunities for the hunters.

NORTHERN COUNTIES — District Forester Robert P. Lewis, Coudersport, reports a high deer population throughout the southern half of Potter County with the highest concentrations of deer in the upper Prouty Run-Nelson Run area, the Cross Fork-Ole Bull area, between Cherry Springs and Lyman Run, and in the Keating Summit area

District Forester George M. Gelman, Wellsboro, reports a heavy deer population in southern Tioga County, especially in Ward, Elk, Morris and Gaines Twps; and in Armenia Twp., Bradford County.

Heavy deer concentrations near recent timber cutting operations are reported by District Forester Paul B. Younkin, Emporium.

CENTRAL COUNTIES — Large deer concentrations are reported near timber cutting operations by District Forester John W. Wilson, Clearfield. The deer population is highest in northern Clearfield County, particularly northern Covington Twp, eastern Union Twp. northwestern Huston Twp., northern Lawrence Twp., and in southern Rush Twp., Centre County.

District Forester Jack E. Paulhamus, Renovo, reports a high population throughout all of northern Clinton County.

From Williamsport, District Forester Francis X. Kennedy reports heavy deer concentrations in eastern Lycoming County, McIntyre and Cascade Twps. and in western Lycoming County in Watson, Cummings, McHenry and Pine Twps.

Robert Coy, District Forester at Bloomburg, in his Sullivan County report, indicated there is an ample supply of deer. The highest concentrations can be found in Fox, Forks, Shrewsbury and western Elkland Twps.

SOUTH - CENTRAL COUNTIES — District Forester Ralph L. Schmidt, Huntingdon, reports an increase in the herd size in northern Huntingdon County. Deer appear to be in good condition.

The Mifflinburg District Forester, Lamar F. Hawn, reports two areas of high concentration: one in Spruce Run, Union County; and the other in New Lancaster Valley, Mifflin County.

Walter D Ludwig, Jr., District Forester at Blain, observed the presence of a high doe population in the mountainous section of western Perry County and in the Licking Creek Valley which is located south of the Juniata River, between Mt. Union and Mifflintown.

SOUTHERN COUNTIES — Little change from last year in the deer herd size or condition is reported by District Forester George R. Winning, of McConnellsburg. Winning's district includes Bedford and Fulton counties.

An increase in the herd size in his area was reported by District Forester Richard R Thorpe, Fayetteville, R D. 2 Thorpe said this situation is particularly prominent in the Cumberland County section, near Pine Grove Furnace.

Jay Irwin Reports On Ag Records Program

The Pennsylvania State University Cooperative Extension Service has developed a successful Agricultural Records Program which is proving to be an effective tool in increasing farm income according to Jay Irwin, Associate County Agent.

"The system is designed for use by any farmer and is truly a modern electronic record-keeping program that is easy to learn, inexpensive, flexible, and confidential," Irwin said.

Many of the features offered by the program include:

1. A periodic cash flow or receipts and expenses which is very valuable for planning and obtaining credit.

2 A complete and accurate printed copy of the depreciation schedule ready for mailing with the tax return. This saves time and costly errors.

3. An itemized summary of farm income and expenses for simplified income tax planning and reporting.

4. A farm business analysis report which provides a net worth statement for borrowing money and efficiency factors to assist in finding weak points in the farm business.

The farmer of tomorrow will be using electronic computers to do his recordkeeping and farm analysis. For further details on the Pennsylvania Agricultural Records Program, contact the Agricultural Extension Service, 1383 Arcadia Road, Lancaster, Pa. 17601.

MEAT IMPORTS CONTINUE AT A HIGH LEVEL

Imports of red meat totaled 1,353 million pounds during the first 8 months of 1968. About 70 percent of this was beef and veal, and represented a 17 percent increase over the first 8 months of 1967. In August of 1968, 153 million pounds of beef and veal were imported — this amount is nearly a tenth of the size of our domestic slaughter for that month.

Fourth-quarter imports are expected to be about 11 percent above those of the same period in 1967. Even though imports are near the quota, it is not expected that the quota will be reached Countries which export meat to the U S. appear to be making a special effort to restrain shipments so as not to invoke the quota.

Soil Absorbs Phosphorus Readily, Renovates Water

University Park — Fine-textured soils have the ability to adsorb or hold onto more phosphorus from sewage effluent than would be added in 100 years if two inches of effluent were applied weekly. This was announced recently by Dr. Louis T. Kardos of The Pennsylvania State University during annual meetings of the American Society of Agronomy in New Orleans, La.

Dr. Kardos said the adsorptive or holding capacity of finely divided inorganic clay particles in the upper 5 feet of fine-textured Hagerstown soil could hold onto 20,000 pounds of phosphorus at one experimental site at Penn State.

This adsorptive or holding capacity of these clay particles becomes a safety valve in renovating sewage effluent, he explained While plant roots become a "living filter" in taking up as much as 39 per cent of the phosphorus in sewage effluent, the clay particles hold onto virtually all the rest of the phosphorus.

The Penn State research has found that water and plant nutrients from municipal sewage treatment plants, which cause pollution problems when fed into streams or lakes, can be utilized in small or medium sized communities by irrigating nearby farm and forest land with the chlorinated effluent.

The experiments determined that only 129 acres of land would be needed to utilize the one million gallons of waste water produced daily in a community of 10,000 persons. This would be applied with an irrigation system putting on two inches of effluent weekly.

Dr. Kardos and associates believe such use of effluent may become a hidden resource for communities. The renovated water trickles down to the ground water reservoir and thence to wells, springs, and streams. Such water easily meets standards for potable water as set by the U.S Public Health Service.

In four years of drought at State College, hay yields increased by 2 to 3 tons per acre where 1 or 2 inches of waste water were applied weekly. Corn yields increased by 30 to 50 bushels per acre in conventional rows 38 inches apart. Such benefits could help to pay costs of installing an irrigation system.

Since any effluent disposal system must operate throughout the year, the system in northern climates must rely more on the adsorptive capacity of the soil than on the "living filter" take-up of plant nutrients.

Forested areas fit into the system by providing better winter infiltration conditions than cropland and also larger phosphorus adsorptive capacities under the acid conditions associated with forest soils.

Dr. Kardos has been associated with the sewage effluent expermiments at Penn State since they were begun in 1962. Recently he was appointed coordinator of the Waste Water Renovation and Conservation Research Project at the University.

It's the fellow who arrives an hour late who wants to talk when everybody else is ready to adjourn.

● County FFA

(Continued from Page 1)

Paul Eckman, son of Mr. and Mrs. George Eckman, Strasburg R1, was elected by the present County officers and will be installed at the January meeting. The new president-elect has corn, tobacco, sheep, fattening hogs, 3 dairy animals and 4 sows as projects. He is interested in Forestry, and has planted 1000 trees on his family's farm. He succeeds Linford Martin, East Earl R1. Garden Spot High School as the County Chapter head.

Other officers are: Lester Bowman, vice president, Garden Spot; Paul Clark, secretary, Pequea Valley; Jeff Pfautz, treasurer, Ephrata; Burnell Buchen, reporter, Manheim; Ken Weaver, sentinel, Warwick; Thomas Aaron, chaplain, Solanco; Carl Erb, corresponding secretary. Penn Manor; Michael Baum, parliamentarian, Elizabethtown

New Meat Inspectors Assigned To Lancaster; Fifteen Others

The Pennsylvania Department of Agriculture's first graduating class of meat inspectors has been assigned to slaughtering and processing plants in 16 counties

State Agriculture Secretary Leland H Bull said the inspectors — 25 of them — have been assigned to plants which formerly operated under voluntary inspection

A State meat inspection law, which became effective five months ago, makes it mandatory that all meat and meat plants in Pennsylvania be inspected Formerly, the only plants inspected were federally inspected plants doing interstate business and those which voluntarily asked for state inspection

Secretary Bull said additional inspectors will begin work as soon as they complete training which consists of two weeks special schooling at Penn State's College of Agriculture and seven weeks on-the-job training at federally inspected meat plants He said the State Agriculture Department expects to have 112 meat inspectors trained by next June

He said he was "pleased" that the Agriculture Department was able to have meat inspectors performing their jobs in November "We've made much progress in a short period of time," he said "The meat inspection bill was only signed into law July 9"

The first group of inspectors have been assigned to 60 plants in Allegheny, Berks, Blair, Bucks, Dauphin, Lackawanna, Lancaster, Lebanon, Lycoming, Luzerne, Montgomery, Montour, Northumberland, Perry, Philadelphia and York counties.

At the plants, inspectors check livestock before slaughter to make certain the animals are healthy. Post-mortem examinations are made on carcasses. Where abnormalities are found, a veterinarian is called in to make final disposition

Inspectors also check ingredients, formulas and cooking temperatures at processing plants

Secretary Bull said inspectors will insist that all meat plants be operated under sanitary conditions He said inspectors have been instructed to close down plants which fail to meet sanitary requirements

He said the work of the inspectors will "assure consumers that they are getting wholesome meat processed under sanitary conditions."

SECOND SECTION

Farm Show Poultry Banquet Is A Fund-Raising Dinner For Pa. Poultry Federation

This vear the annual Farm Show Poultry Banquet will take on a new look bv becoming a "fund raising" dinner for the Pennsylvania Poultry Federation.

A well-kno"n "businessman's preacher" and radio comentator, for whose work a national foundation has been formed will deliver the featured address at the Penn Harris Hotel Ballroom in Harrisburg (Penna) on Wednesdav. Januarv 15 (1969) following the dinner scheduled for 6 30 p m. The speaker is Dr Tom Haggai of High Point. N C. who for the past five years has averaged a speech a dav before business civic, educational and religious groups throughout the United States as well as internationally

He is equally well known for his syndicated radio program "Values for Living" which is broadcast daily from coast to coast

Although Dr. Haggai has been praised bv newspaper and magazine writers with such superlatives as "wildly funny and searchingly serious" and as being "a man with the golden voice," he insists that his spiritual and nationalistic doctrines have brought about his conspicuous popularity as a speaker. (Conversely, an editorial writer said to him when the new foundation was formed· "Dr. Haggai could tell an audience their steak was tainted, and they would love every word of it.")

When asked about his hobbies Dr. Haggai quickly replies with a spark in his eye, "My only hobby is the Boy Scouts of America which I consider our finest preventive medicine in combatting delinquency among our male youth"

Co-Chairing the Banquet are the Messrs Hendrik Wentink Donald Horn, and George Hauer, who are optimistic in filling the ballroom to capacity. Tickets for this event are available through the Pennsylvania Poultry Federation Office in Harrisburg

RANDOM SHOOTING UNLAWFUL DURING BIG GAME SEASONS

Sportsmen are reminded that they mav not shoot at random during the big game seasons which started Monday, November 25.

It is unlawful, during big game seasons, to shoot at any mark or target other than legal birds or animals, except at a properly constructed target or a dead tree within 200 yards of the hunting camp or headquarters of the shooter.

Shooters are warned that it is unlawful to fire at public utility poles. transformers, insulators, traffic signs, warning posters, etc.

NEW COUNTY FFA OFFICERS. (left to right) seated. Burnell Buchen, reporter, Manheim; Lester Bowman, vice president, Garden Spot; Paul Eckman, president, Lampeter-Strasburg; Jeff Pfautz, treasurer, Ephrata. Standing, Paul Clark, secretary, Pequea Valley; Thomas Aaron, chaplain, Solanco; Carl Erb, corresponding secretary, Penn Manor and Michael Baum, parliamentarian, Elizabethtown. Not present was Ken Weaver, sentinel from Warwick. L. F. Photo

Anyone who grows corn or soybeans knows that our soils tend to be acid. You contribute quite a bit to this acidity each time you apply fertilizers. □ But Ortho UNIPELS have a "low calcium carbonate equivalent." This means that UNIPELS cause less depression of your soil's pH. And you know with a more favorable soil pH you are bound to get higher yields. □ On top of that, UNIPELS, plowed down in the fall, work for you all year 'round: fall, winter, spring, and summer. That's why it's called "The All-Season Fertilizer" □ Come see us soon for the facts and figures on how you can save money on liming costs and earn more money from higher yields with UNIPELS.

How you save on liming costs with Ortho UNIPELS

FOR THE
FARM WIFE AND FAMILY

Turkey On The Double

Wondering what to do with the little chunks of turkey that aren't big enough to use in a sandwich? Try using them in some of the following recipes. If your family is tiring of turkey by the time you get to the little "bites" you could make up these casseroles and freeze them for use over the busy holiday season coming up.

TURKEY-MUSHROOM SCALLOP

- 1½ cups mushrooms, chopped
- 2 or 4 tablespoons butter or margarine
- 1 tablespoon flour
- 1 cup breadcrumbs, soft
- 1 cup milk, whole or skim
- 1 cup turkey, cooked, chopped
- 1 tablespoon parsley, coarsely chopped
- 2 eggs, beaten
- ¼ teaspoon salt
- ⅛ teaspoon pepper
- ⅛ teaspoon onion juice
- 1½ cups mushroom sauce*

Brown mushrooms lightly in the fat Stir flour into mushroom mixture. Add breadcrumbs Add milk slowly, stirring constantly Cook over low heat 5 minutes

Add turkey, parsley, eggs, and seasonings to mushroom mixture Pour into baking dish. Set in a pan of hot water. Bake 40 minutes in moderate oven (375 degrees), or until firm. Cut into rectangles Serve hot mushroom sauce over each portion.

*Easy Method Sauce: Use a 10½ ounce can condensed cream of mushroom soup in place of homemade mushroom sauce Use a 7 x 7 x 2-inch baking dish for this recipe Makes 6 servings.

TURKEY PAPRIKA

- 2 cups sliced, cooked turkey
- ½ stick butter (¼ cup)
- 1 medium onion, sliced
- ¼ cup flour
- 1 teaspoon salt
- 2 cups milk
- 2 egg yolks, beaten
- 4 teaspoons paprika
- 4 ounce can mushroom stems and pieces, drained
- 1 cup dairy sour cream
- 1 tablespoon poppy seed
- 2 tablespoons btuter
- 7 ounce package noodles, cooked

Melt ½ stick butter in skillet. Add onion and cook until tender. Blend in flour and salt. Remove from heat. Gradually add milk. Stirring constantly, cook until mixture thickens. Stir ¼ cup white sauce into egg yolks; return to hot mixture. Bring to boil, stirring constantly. Reduce heat to low and stir in paprika. Add mushrooms and turkey slices. Simmer 5 minutes. Stir in sour cream and heat just until sauce is hot. Serve on Poppy Seed Noodles. To make Poppy Seed Noodles· Add poppy seed and butter to drained noodles. Toss together lightly. 6 servings.

* * * *

TURKEY CURRY

- 2 cups diced, cooked turkey
- ½ stick (¼ cup) butter
- ¼ cup chopped onion
- ¼ cup flour
- 1 teaspoon salt
- ½ teaspoon ground ginger
- 1 tablespoon curry powder
- 2 cups milk
- ¼ cup chopped celery
- 1 cup chopped unpared apple

Cooked rice

- ½ cup each toasted slivered almonds, toasted coconut, and crisp crumbled bacon

Melt butter in saucepan. Add onion and saute about 5 minutes. Blend in flour and seasonings Remove from heat Gradually add milk. Stirring constantly, cook until mixture thickens. Add turkey, celery, and apple. Cook about 5 minutes. Serve over rice with toasted almonds, coconut, and bacon sprinkled on top. 6 servings.

* * * *

TURKEY GRAVY ON TURKEY SLICES WITH CORN BREAD STUFFING

Leftover turkey and gravy

- ½ cup finely chopped onion
- ½ cup finely chopped celery
- 2 tablespoons butter or margarine
- 3 cups crumbled corn bread
- ½ teaspoon salt
- ⅛ teaspoon pepper
- ¼ teaspoon poultry seasoning
- ¼ teaspoon sage
- 2 tablespoons water
- 1 egg, well beaten

Cook onion and celery in butter in a skillet until tender. Add mixture to crumbled corn bread which has been placed in a 2-quart baking dish. Sprinkle with seasonings which have been mixed together. Combine. Add water and egg. Toss together with forks. Bake 20 to 25 minutes in a 450 degree oven. Serve turkey slices on top of corn bread stuffing. Ladle gravy over slices before serving. 4 servings.

* * * *

TURKEY-NOODLE BAKE

- 4-ounce package noodles (about 2 cups uncooked)
- ¼ cup flour
- 2 cups mushroom liquid and water
- 2 chicken bouillon cubes
- ¼ teaspoon salt

Pepper, as desired

- ½ teaspoon poultry seasoning
- 1 tablespoon chopped pimiento
- 4-ounce can mushroom stems and pieces, drained, chopped
- 2 cups cooked turkey, cubed
- ¾ cup shredded sharp process cheese
- ⅓ cup fine dry breadcrumbs
- 1 tablespoon butter or margarine

Cook noodles as directed on package; drain. In a saucepan, blend flour with a little of the liquid to make a paste. Gradually stir in remaining liquid. Add bouillon cubes and seasonings. Bring to a boil, stirring constantly. Reduce heat to simmer; cook 1 minute longer, stirring as needed. Add pimiento and mushrooms to sauce. In a 2-quart casserole place half the noodles and half the turkey in layers Cover with half the sauce Repeat layers. Top with cheese; sprinkle with breadcrumbs; dot with fat. Bake, uncovered, at 350 degrees 30 to 40 minutes or until bubbly and browned Makes 6 servings.

* * * *

TURKEY SCALLOP

- 2 cups roast turkey, chopped
- 2 cups cream of celery soup
- ¼ cup diced green pepper
- ⅛ teaspoon nutmeg
- 3 cups toasted bread cubes
- ¼ cup crumbled Blue cheese

Combine turkey, soup, green pepper, and nutmeg. Add salt if needed Place all but 1 cup bread cubes in buttered 2-quart casserole. Add creamed turkey mix-

Correspondence Courses

DECORATE WITH CONFIDENCE

Now is a good time to start dreaming about the decorating you'll do after the holiday season. You may decide to solve your own decorating problems or you may have someone do it for you.

It's a rewarding experience to do your own decorating. If you don't feel confident enough to be your own decorator, you'll find practical and easy-to-follow ideas in a home study course on house furnishing.

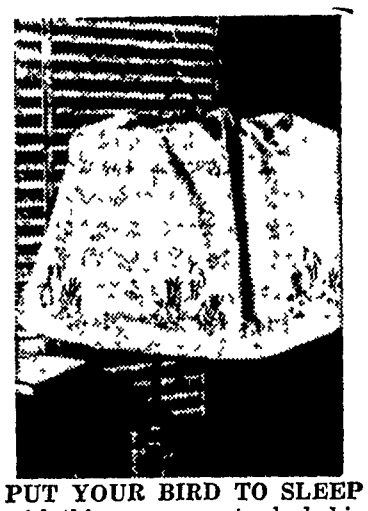
Offered by The Pennsylvania State University, the course suggests ways to add charm and distinction to your home. In the course you'll learn how to combine colors to get a pleasing effect; to decorate an awkward window; how to place furniture, accessories, and pictures skillfully.

The complete House Furnishing course will be mailed to you if you send $2 25 to House Furnishing, Box 5000, University Park, Pennsylvania 16802. Check or money order should be made payable to The Pennsylvania State University.

Many young men think that the big jobs are sewed up, or that they are obtained by luck. Consequently they do just enough work to hold the jobs they have. They do nothing to improve their minds or add to their knowledge or skill. They cannot be bribed to read books or trade papers of their business. They persists in looking, thinking and acting like the common run of men. At 50 they are just where they were at 25.

Why do men refuse to observe what is so clear? Is it lack of ambition, lack of intelligence, or lack of energy? Do they prefer the shiftless life?

A large employer said recently that only one man in a thousand is seriously interested in improvement or advancement.



PUT YOUR BIRD TO SLEEP with this zany cover to shade his cage. The design is a whimsical concoction of birds, butterflies and flowers. It is embroidered in a gay combination of colors on fine cotton fabric. Free instructions are available by sending a self-addressed, stamped envelope to the Needlework Editor of this newspaper along with your request for Leaflet PE 3988.

● For The Farm Wife

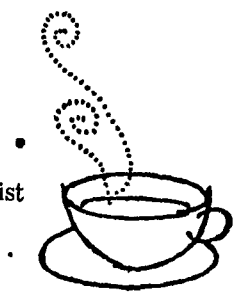
(Continued from Page 14)

ture. Sprinkle with cheese, then top with remaining bread cubes. Bake at 350 degrees for 40 minutes or until sauce bubbles through topping. Makes 6 servings.

Most American girls marry as early as possible because they fear, and rightly, too, that if they don't, the man will be captured by some other designing female. It's the climate.

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist



Laundry Tips

Sort your clothes before washing for better results Sort first by fabric type, then by color, and then by degree of soil.

Avoid washing lacy undergarments with work overalls.

Remember to empty pockets.

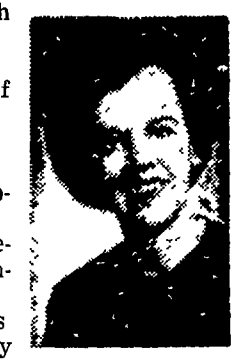
Shake sand, grass, and loose dirt out of pockets and cuffs.

Sew up rips and tears.

Replace any missing buttons

Close zippers and tie loose strings together.

Remove pins, ornaments, buckles, removable shoulder pads, and washable trimmings.



THOMAS

Soak or prewash heavily soiled articles Treat stains as soon as possible after they occur. For best results, pretest spots and stains. For this purpose include hydrogen peroxide, bleach, glycerin, Vaseline petroleum jelly, pepsin, rust remover, and a good cleaning fluid.

Also pretreat especially soiled areas such as shirt collars and cuffs Do this by dampening the area and rubbing with the same kind of soap or detergent you use in the washing machine. Or you may make a paste of the soap or detergent and water and rub it in with a brush or your fingers.

Oily or waxy stains are more easily removed if you pretreat them with a drycleaning solvent.

Use enough water of the right temperature. Water should be 140 to 160 degrees in the washer. Be sure the water heat thermostat is set high enough.

Follow manufacturer's instructions for using your washing machine.

Shop Around Before Buying Furniture

You can learn a lot about furniture quality when you talk with reliable salespeople in different stores

Compare the quality of goods. High price and quality are not always related.

Learn manufacturer's names.

Compare workmanship on various pieces and decide which manufacturer provides the quality workmanship you want.

If you recognize good furniture at a good price when you see it, you'll be better equipped to choose the right furniture for your home.

Milk Can Last Longer

Everybody knows milk is perishable — but apparently it is not nearly so perishable as we had thought.

Under household refrigeration (usually 45° to 50° F.) milk keeps an average of 7 davs. But tests conducted under ARS research contract show that simply lowering the storage temperature to freezing or slightly above will extend the storage life to as long as 7 weeks.

Long-accepted ideas about milk perishability were in for even more of a jolt when the research showed that milk pasteurized under higher-than-normal temperatures would keep as long as 20 weeks and more.

These findings mav well lead to drastic changes in the storage and distribtuion practices of the fresh milk industry.

The work was done by the Pet Milk Company under an ARS research contract Both winter and summer milks were pasteurized under normal conditions (165° to 172° F. for 16 seconds) at six Southern dairies. Then they were cooled to 32° F. and flown in ice to Pet Milk's Research and Development Center, Greenville, Illinois, where they were stored at 32 dgrees, 35 degrees, 40 degrees, and 45 degrees F. Weekly bacteriological tests and evaluations by a trained taste panel indicated that at the two lowest storage temperatures some of the summer milks were still safe and flavorful after 7 weeks, and the winter milks after 4 weeks.

When these tests demonstrated the value of low-temperature storage for normally pasteurized milk, the scientists next tried higher pasteurizing temperatures to see if they could extend the storage life of milk even further. With their experimental equipment they pasteurized milk at 200° and 220° F. for the usual 16-seconds.

They also tried flash-pasteurizing at these temperatures for a half-second.

The milk samples were stored at the same 4 temperatures as the commercial samples and subjected to the same weekly bacteriological and taste tests. Only the samples pasteurized at 220° for 16 seconds were still acceptable by both of these criteria after 13 to 20 weeks of storage at 32° F. In general, the storage life of most of the samples decreased with milder processing conditions and with higher storage temperatures.

The ultra-high pasteurization temperatures did not destroy milk flavor. Using fresh market milk as a control, the taste panel evaluated sample each week. They did detect a cooked flavor immediately after pasteurizing, but within the first week of storage, this off-flavor disappeared.

Although these results could profoundly affect the dairy in-

(Continued from Page 16)

dustry, the original purpose of the work did not concern normal dairy operations at all. The research was part of a continuing ARS program to protect the Nation's milk supply in the event of nuclear attack or accident.

Of immediate concern was the relatively short-lived radioactive nuclide iodine-131. Because iodine-131 has a half-life of 8 days, and virtually disappears within 40 days, the objective of the research was to determine whether milk could be stored long enough to permit the natural decay of this radioactive substance to a harmless level.

In line with this objective, one phase of the experiment consisted of pasteurizing the milk at the ultra-high temperatures and storing it in bulk at 32° F. for 3 to 4 weeks to permit decay of any iodine-131 with which it may have been contaminated Then it was repasteurized at both high and ultra-high temperatures (175° to 220° F.), packaged, and stored at 32 degrees, 35 degrees, 40 degrees, and 45 degrees F. Most of the samples kept for more than 10 weeks (including the initial bulk storage) and many were still good after 23 weeks when the test supply was exhausted.

The work proved that, under emergency conditions, milk could be stored long enough to permit decay of iodine-131. From a practical point of view, however, using this method for decontaminating milk would require storage facilities that are not generally available today.

In any event, ARS has developed an ion-exchange method of removing strontium-90 from milk which could also be used to remove iodine-131 (AGR. RES., Sept. 1961, p 14) Strontium-90, another radioactive nuclide, is of more concern than iodine-131 because it has a half-life of 27 yrs. This work was conducted in cooperation with the Atomic Energy Commission and the Public Health Service.

Of all merchants, wholsale or retail, I think those who sell beverages, especially wine and beer, are the most friendly and polite.

The whole world is pleased when a young man makes a success out of his life.

In keeping with the holiday spirit, Pennsylvania Poultrymen presented Pennsylvania produced eggs, smoked pheasant, and a 16 lb. hen turkey to Governor Raymond P. Shafer. Left to right are: Paul S. Konhaus, Mechanicsburg; Harry R. Ulrich, Harrisburg; Governor Shafer; Dauphin Co. Senator, William Lentz; and Charles R. Phillips, Pillow.

HARRISBURG — Pennsylvania's tobacco crop was the lightest in more than 30 years but of excellent quality and color, the State Crop Reporting Service said today.

The Service said the crop of 36 million pounds was the smallest since 1937 The average per acre yield was estimated a 1 800 pounds, 50 pounds less than last year.

MANUFACTURED BY

Allied Chemical Corporation

GENERAL OFFICE NEW YORK, NEW YORK

RUMINANT LIQUID SUPPLEMENTS: "Now, for the first time, Northeastern dairymen have the opportunity to take full advantage of the feed cost reduction system provided by the unique combination of non-calcium-bearing ammonium polyphosphate and feed urea in an ideal nutritional environment that assures the ultimate in feed palatability and nutrient digestability.

The use of supplemental nonprotein nitrogen in dairy feeds for high producing dairy cows has posed some discouraging problems such as ingredient segregation, pelleting difficulties, and feed palatability. Because of these concerns it is not unusual today to note circumstances where Northeastern feed manufacturers have decided to withdraw feed urea from their formulations.

This is indeed unfortunate!

This denies dairymen the means of reducing feed cost through the use of proper amounts of nonprotein nitrogen in the feeds made available to them.

ARCADIAN COMPENSATOR LIQUID SUPPLEMENTS overcome all of these problems encountered with dry feeds and, at the same time, help lower out of pocket cash costs for purchased compensatory nutrients.

A new era in dairy cattle feeding is upon us.

Allied Chemical is proud to have pioneered the compensator concept and be the first to make this exciting new dairy cattle feeding technique available to Northeastern dairymen" Dr. Gilbert Porter.

For information contact Agricultural Division, Allied Chemical Corporation, 20 Community Place, Morristown, New Jersey 07960. Phone 201-538-8000, Ext. 6851—Mr. Boyce

Moldy Feeds: Source Of Livestock Losses & Death

A clearer understanding of livestock damage caused by moldy feed is leading to better diagnosis and control of fungus-caused problems.

Research indicates that mold can reduce production efficiency and cause death, ARS specialists suggest that farmers seek laboratory tests and post-mortem examinations to establish the cause of unexplained abortions in cattle or poor growth and death losses in swine.

The mold **Aspergillus fumigatus**, for example, causes several diseases in poultry and livestock, including fungal abortion in cattle. Livestock need not eat contaminated feed to get into trouble; mold spores enter as easily when animals merely breathe spore-laden dust from moldy hay.

Aspergillus flavus causes damage indirectly by producing a poison called aflatoxin, which may kill swine by disorganizing and destroying liver cells. Small amounts of aflatoxin administered experimentally over a period of time cause pigs to use feed inefficiently and grow slower; a single, larger dose produces death in 1 to 7 days.

ARS veterinarian S. J. Cysewski and scientists at the National Animal Disease Laboratory, Ames, Iowa, followed the exact progression of aflatoxin damage.

Young pigs weighing about 33 pounds became listless and began shivering 6 hours after receiving orally about 29 mg. of crude aflatoxin — a dose known to be lethal. They stopped eating but continued drinking. Droppings were stained with blood after 24 hours, and pigs started dying from then on.

Post-mortem examination of pigs at various stages of the study confirmed that liver damage started 3 hours after aflatoxin was administered. Extent and severity of damage increased, and many liver cells were destroyed within 72 hours. Remaining cells showed various signs of internal disorganization.

Plant poisons or tars that pigs may chew out of old roofing and clay pigeons cause liver changes similar to those caused by aflatoxin. The best specific diagnosis, Cysewski found, is to check either the feed or urine of stricken pigs first for traces of aflatoxin in natural or metabolically altered form. This is readily done by thin-layer chromatography, a chemical method for separating and identifying related substances in complex mixtures. Aflatoxin poisoning is then confirmed by finding the toxin and typical liver damage in autopsied pigs.

Pigs in these tests received aflatoxin derived from known strains of mold grown on rice in the laboratory. Buy Cysewski says that the symptoms and evidence of liver damage were indistinguishable from those observed by other scientists in field cases.

A woman seldom comes out of a sullen spell until she's sure her husband has suffered as much as she thinks he should.

Town & Country

VERSATILE ALL-STEEL BUILDING FOR ALL-AROUND USES

Do you need a garage, equipment shelter, cattle shelter, milking parlor, machine shop, office, meeting hall? The Town and Country will best fit your needs—and your pocketbook—now and in the future. It gives you clear span construction from 25′ up to 60′ . . . choice of 10′ or 14′ ceiling heights. If you need more space later you can add on easily—without wasting building material.

GOES UP EASY

There's no frame to build. You just bolt together heavy-gauge, 3″ corrugated steel panels to put up this general purpose building. Wide selection of doors and window styles available.

The Price is Right at . . .

IT FIGURES!

My milk check is bigger again this month than it ever was before I fed my cows Green Pastures Dairy Feeds! My profit is bigger too. Without a doubt those are the two most important benefits. Besides that, my herd is healthier and more productive. Want to prove it? Start your cows on the Green Pastures Program today. You'll soon be enjoying bigger milk check benefits too.
